

## **If I were Prime Minister I would change:**

*If I were Prime Minister, I would change the age to vote. I would allow children over the age of 12 to vote. The reason being is that at this age they I know more about what is happening globally as well as their own city/country. Children should have a voice for their future. The word DEMOCRACY says it all. Demo meaning power and cracy meaning people. Power of the people which signifies that children also have power. If children over 12 could vote whether we should stay in the EU or not, I don't think Brexit would've happened. The reason being is that they know that Brexit will affect some of their dreams to aboard. For example, if a student in London wanted to go and study in Amsterdam they would have to pay for a visa because England won't be friends with the country (in Europe) that they want to study in. Brexit happening will lead to the expenses of bills increasing and this will affect families who are short on money. Businesses will suffer as the people that have come from different parts of Europe to come and work here will have to get visas that they didn't need when they first came. If the prices of goods go up no one will buy the products and business will go out of the business industry as they don't have enough money to continue. This is what the older generation and whoever voted to leave the EU don't understand. Brexit happening will create massive problem for all of us as well as them. They don't understand that they will have to kiss goodbye their 50p, 70p things as all these prices will be going UP. The trade that used to be so cheap will now be hard to live with thanks to Brexit. Let the Future take over. Let them decide what is right. They have visions!*

*If I were Prime Minister, I would change the age for voting!*

**BY THE WAY I ACTUALLY DO KNOW THAT BREXIT IS HAPPENING AND I AM GUTTED ABOUT IT!!**
